

Contractor prequalification Ateliers du Rhône

Assessment of five tendering contractors · August 2026

Method

Contractors were assessed on financial standing, relevant experience, proposed programme, health and safety record, and the extent of qualifications attached to the tender. Price is reported but was not the sole determinant.

Constructions Valaisannes SA recommended

Tender CHF 2 841 000. Programme 62 weeks. No qualifications. Three comparable adaptive reuse projects in Valais in the last five years. Accounts show adequate cover against the contract value.

Bâtir Rhône Sàrl

Tender CHF 2 903 500. Programme 58 weeks, the shortest offered. Provisional sums retained for the strengthening works, which transfers risk back to the client.

Alpes Bau AG

Tender CHF 2 917 200. Programme 64 weeks. Access assumptions attached that are not consistent with the site constraints.

Edilizia Lombarda Srl

Tender CHF 2 788 000, the lowest. Programme 71 weeks. Qualifications on currency and cross-border labour. The programme is the concern.

Sion Bâtiment SA

Tender CHF 3 102 400. Programme 60 weeks. No qualifications. Price is not competitive against the field.
